

# 2024 Bonus Rates

## International Prudence Bond

This document is for information only and should not be considered a financial promotion. If you are not a financial adviser and there is terminology included that you would like to discuss, then please contact your adviser.

Shown below are the Overall Yields which combine Regular and Final Bonuses. The rates represent the compounded annual yield applicable for each investment period. For example, for a client who had invested in the Euro With-Profits Fund in April 2003, the amount added to their fund on encashment would be equivalent to 4.40% a year. For top-up investments, the Overall Yield depends on the date the top-up was made, not the date of the original bond.

### Important information

Past performance is not a reliable indicator of future performance. The rate of future bonuses in the PAC With-Profits Fund and therefore the rate of growth in the unit price cannot be guaranteed.

Final bonus may vary and is not guaranteed.
